

Frontend developer

## MohammadAli Saeidi

I am currently studying Computer Engineering at Hamedan University of Technology, with a strong foundation in programming, algorithms, and software development. I have a keen interest in design and enjoy creating user-friendly interfaces. Collaboration is important to me, and I actively engage with my team and other teams. I am highly motivated to support others by sharing my knowledge and contributing to their growth. Overall, I am passionate about creating excellent user experiences through attention to detail and continuous learning.

## SKILLS

### React

Core Concepts, Hooks, Libraries and Tools like React Router, Material UI, Ant Design, Swiper, Axios, JSON-Server

### Redux and Redux toolkit

### NEXT.js

Dynamic Routing, SSR (Server-Side Rendering), SSG (Static Site Generation), ISR (Incremental Static Regeneration), CSR (Client-Side Rendering)

### Next Auth

Basic practical knowledge of Next Auth for Next.js apps, including providers, credentials, and session management. Some experience with credentials authentication, and adapters like Prisma.

### Git

### Design Patterns

Common Design Patterns like Singleton, MVC, Abstract Factory, etc.

### Agile Principles and Methodologies – Scrum, Microsoft Azure DevOps, Jira

Practical knowledge on concepts like User story, Epics, Sprints, Backlog, Project Management. Experienced in calculating estimated time for tasks using formula. Experiences participating in meetings to plan and prioritize tasks.

### Clean Code principles

### Figma

### Adobe Photoshop

### Adobe Illustrator

### User Experience

## Experience

### Online Food Shop (Pizza) - Redux Practice Project

The Online Food Shop - Pizza App is a React-based project designed to simulate an online food ordering system for pizzas. It serves as a practical exercise to enhance proficiency in React, Redux, and Redux Toolkit while creating an interactive user interface. The application fetches fake data using Axios from a JSON Server and utilizes various tools and technologies to deliver a seamless experience.

### Game Developer

Sarvenhana Psychological Research Co · Full-time

Sep 2020 – Aug 2022 · 2 yrs

Tehran, Iran

During my game development experience, I acquired a diverse skill set that shares common ground with front-end development. Redesigning the user interface, cross-platform development, API communication, code optimization, HLS integration, project planning, and resource optimization (including assets) are all relevant to the front-end realm. While not exclusively focused on front-end development, my skills are easily transferable, making me well-prepared to excel in React and web development.
